Organization	Names
CDC	Maria Rein, Joel Chehab, Stelio
USAID	Stelio Maposse, Dario Filimão
FGH	Eurico José
Jembi	Pinki Meggi, Zainabe Dada, Ketmia Matavele

2 DISCUSSED POINTS

- **TX_CURR**

- a. **Change the criteria order for exclude the patient**

- i. Currently the module structure first we exclude Dead, Stopped or suspend treatment, abandoned
 - ii. We will need to change the way and first see all that have drugs pick up

- b. Case that patient have transferred out state but have next scheduled for Drug pickup or consult

- i. Need data quality report to analyse all these scenarios
 - ii. Something should be run before, data quality report to be done by next quarter where partners can run queries before check the data quality before submit the MER modules

- c. Patients who were transferred out and still picking up drugs and still getting treatment

- i. Patients can be transferred out and after a while transferred in but we don't have this information.
 - ii. Guidelines say the transferred out should be excluded
 - iii. Look at people who are picking up drugs and having consultation
 - 1. If patient have next drug pick up, but when then patient is not active and for consultation is active - ideally we should be using pharmacy, but currently we are looking at both

3 POST MEETING ACTION ITEMS

#	Action	Assigned To	Deadline
1	Analyse the Quality Date report	Team	
2	Signe off the changes to implement requirements for transferred out patient	CDC	

4 NEXT MEETING

Next Meeting: TBD
