Charlotte (CDC state.gov)" <HillCE@state.gov>

Dear all,

Circulating key decisions/agreements from our meeting at 1pm today regarding early retention indicators:

1) Agreement with cohorts as defined in slides below. This has shorter buffer than compared to past reporting (and as indicated in the original early retention SOP), but consensus was that it was needed to maximize performance improvement.

a. 1mo Retention Cohorts

i. COP19 Approval Meeting in March 2019 (Joburg)

1. Tx Enrollment: 21 December 2018 – 20 January 2019

ii. 25% increase in retention by May 2019

1. Tx Enrollment: 21 February 2019 – 20 March 2019

b. 3mo retention cohort:

i. 25% increase in retention by May 2019

1. Tx Enrollment: 21 December 2018 – 20 January 2019

2) Agreement that, given shorter buffer, and to improve completeness of the reported months from now to May, we will be asking all clinical partners to retrospectively submit those reporting months in May.

a. Retrospective submission of reporting months of February up to May 2019 will be due May 5th 2019.

3) Agreement on indicator definition and requirement, with one edit to be made to the numerator for 1mo cohort label to stipulate "Alive".

4) Agreement for JEMBI/FGH do to **job aid** for data entry clerks on how to run query which will be **released with query**

5) Agreement for CDC/USAID to circulate timetable for cohorts by **COB tomorrow**

6) Agreement that query will be fully tested by JEMBI, FGH and CHASS **by COB Feb 8th**

7) Agreement that all clinical partners will have to submit retrospective data from September 2018 to February 2019 reporting periods for both indicators **by COB 12th February**.

Thanks,

Joel Chehab

Subject: KEY DECISIONS: Meeting to discuss retention indicators

Importance: High

Dear all,

Circulating key decisions/agreements from our meeting at 1pm today regarding early retention indicators:

1) Agreement with cohorts as defined in slides below. This has shorter buffer than compared to past reporting (and as indicated in the original early retention SOP), but consensus was that it was needed to maximize performance improvement.

a. 1mo Retention Cohorts

i. COP19 Approval Meeting in March 2019 (Joburg)

1. Tx Enrollment: 21 December 2018 – 20 January 2019

ii. 25% increase in retention by May 2019

1. Tx Enrollment: 21 February 2019 – 20 March 2019

b. 3mo retention cohort:

i. 25% increase in retention by May 2019

1. Tx Enrollment: 21 December 2018 – 20 January 2019

2) Agreement that, given shorter buffer, and to improve completeness of the reported months from now to May, we will be asking all clinical partners to retrospectively submit those reporting months in May.

a. Retrospective submission of reporting months of February up to May 2019 will be due May 5th 2019.

3) Agreement on indicator definition and requirement, with one edit to be made to the numerator for 1mo cohort label to stipulate "**Alive**".

4) Agreement that retention calculation for both indicators will be produced in the report using requirements documentation agreed calculation, to facilitate use at facility

5) Agreement for JEMBI/FGH do to **job aid** for data entry clerks on how to run query which will be **released with query**

6) Agreement for CDC/USAID to circulate timetable for cohorts by **COB tomorrow**

7) Agreement that query will be fully tested by JEMBI, FGH and CHASS **by COB Feb 8th**

8) Agreement that all clinical partners will have to submit retrospective data from September 2018 to February 2019 reporting periods for both indicators **by COB 12th February.**
